Cracking steps

Install IAR and run EWSTM8-2104-Autorun.

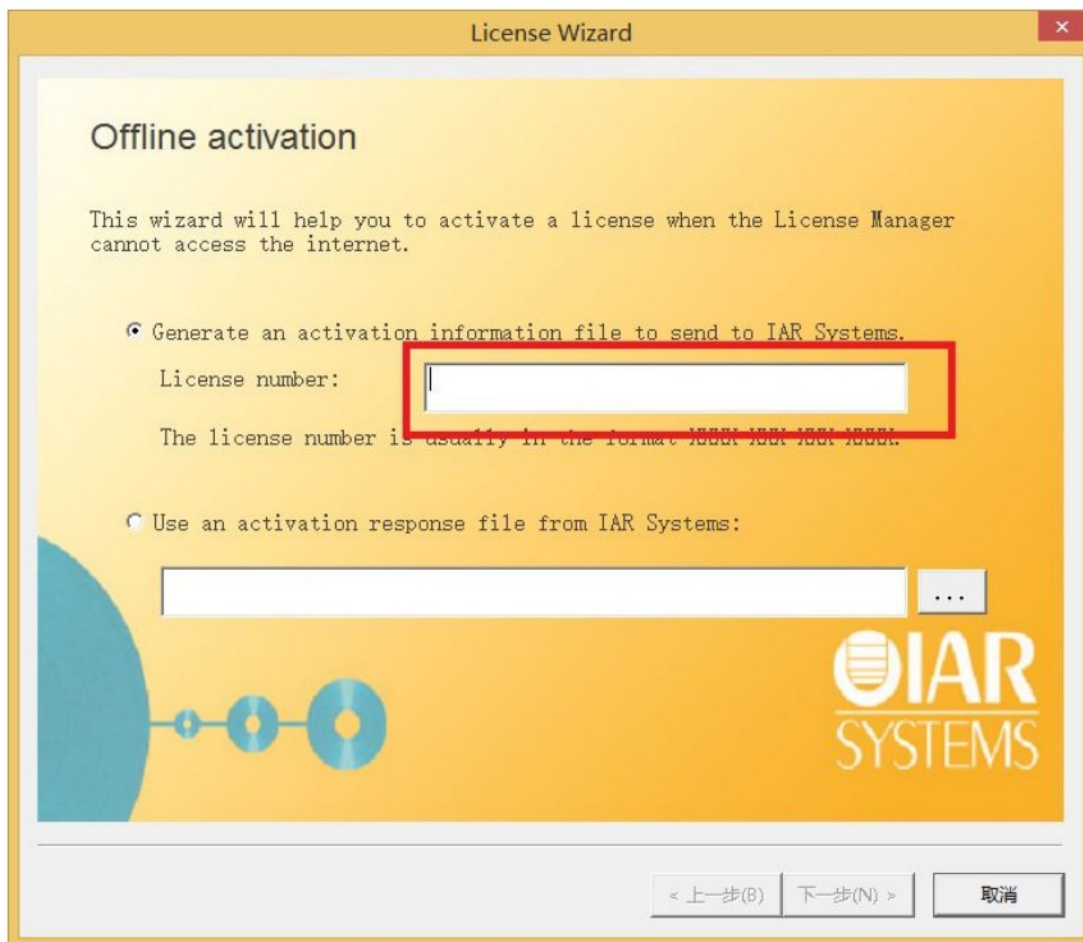

Enter the license manager

Select offline activation

In the first step of the License wizard, a serial number is required. Start the registration tool.

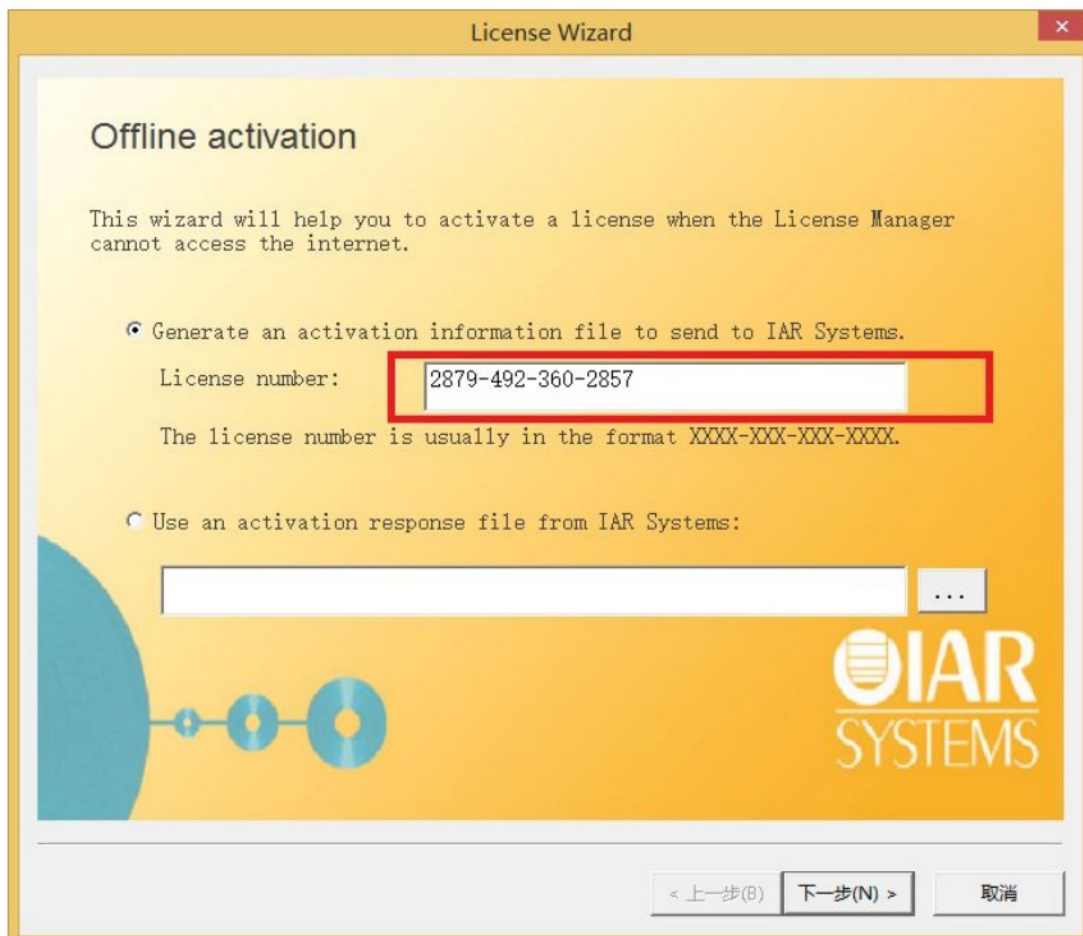

In the registration machine, for the product option, select "IAR Embedded Workbench for STMicroelectronics STM8, Standard".

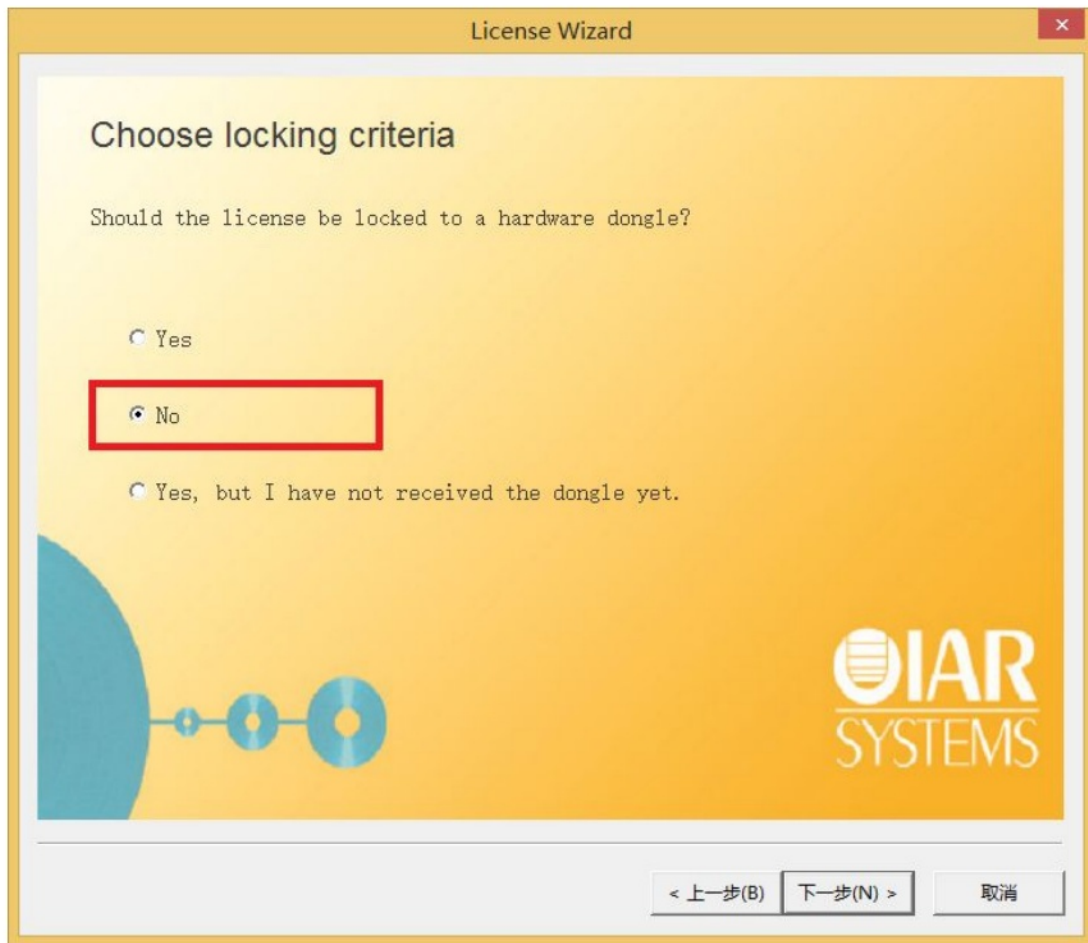

Click the serial number generation button.

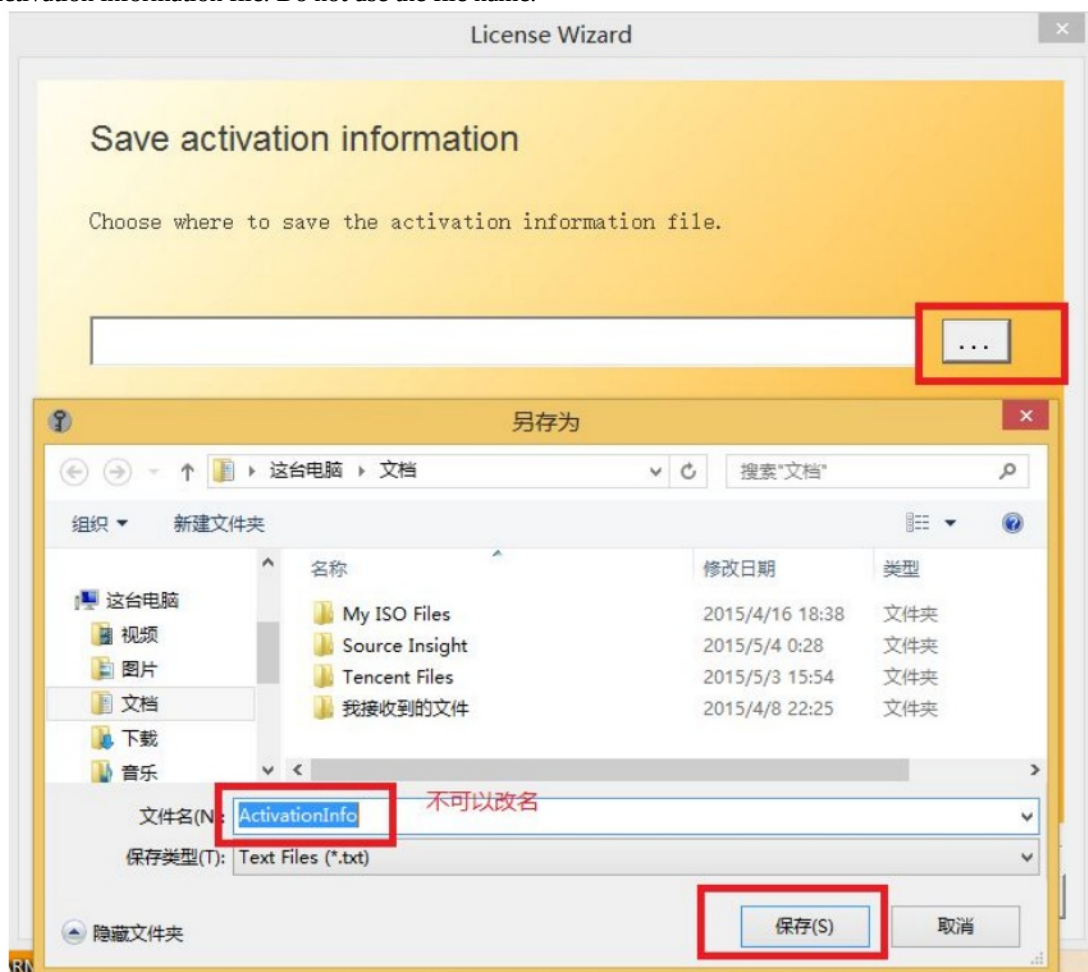

Copy the serial number from the registration machine to the License Wizard.

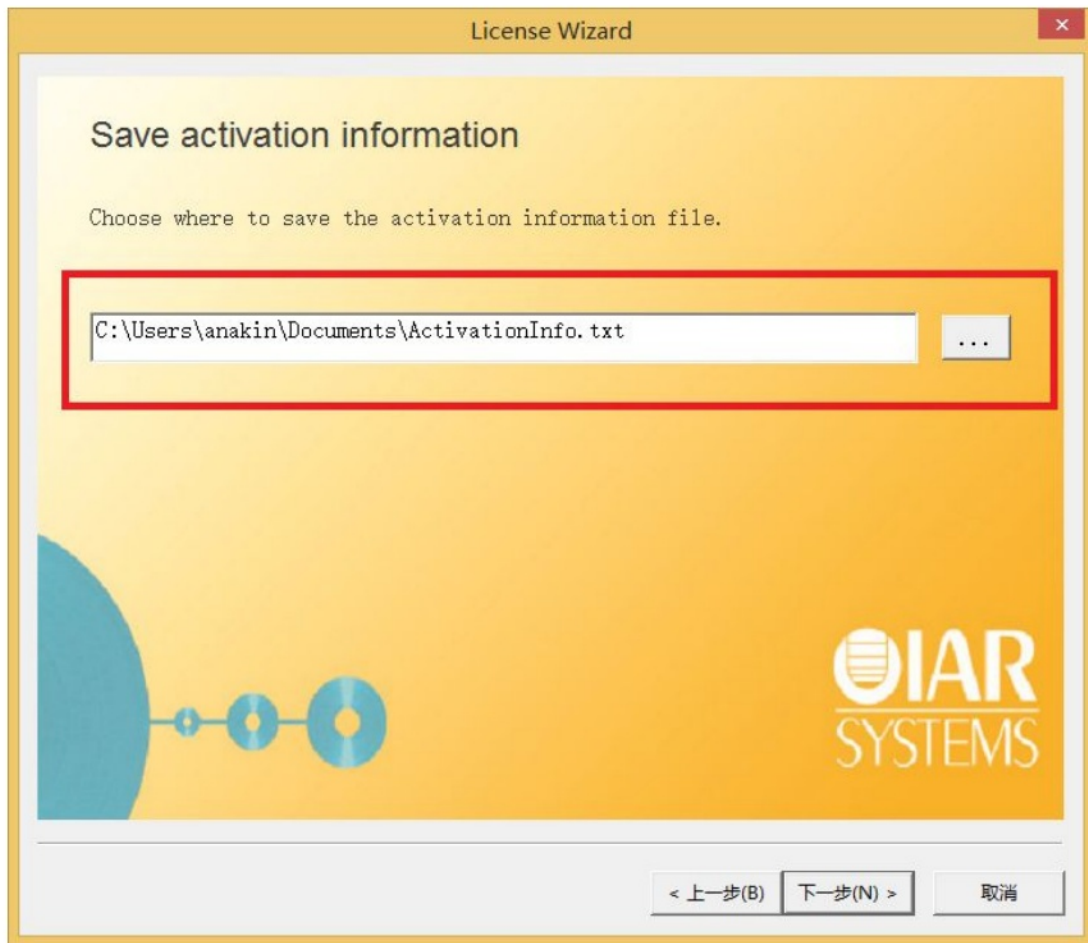

Is it related to the software dongle?

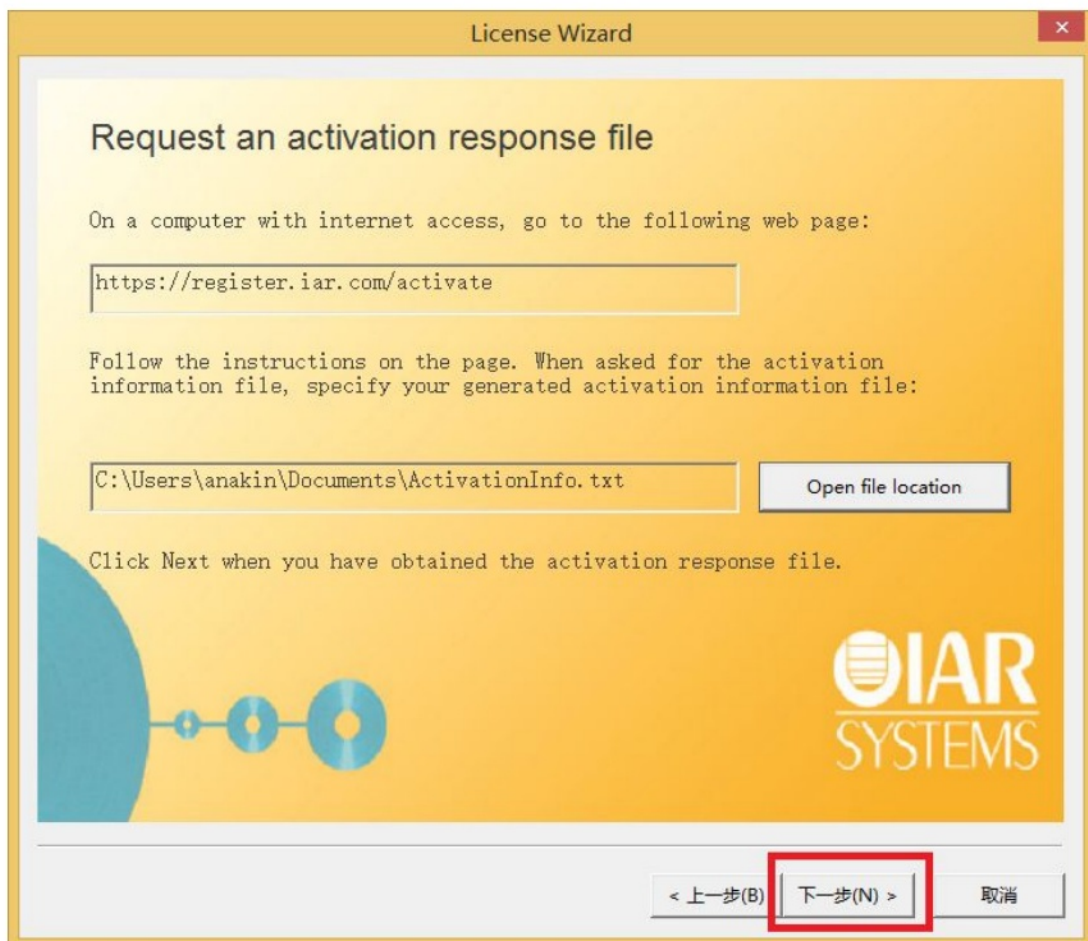

Generate the activation information file. Do not use the file name.

The next step

At this point, return to the registration machine interface. Select the activation information file through the "Browse" button, and click the "Activate License" button to generate the corresponding activation file.

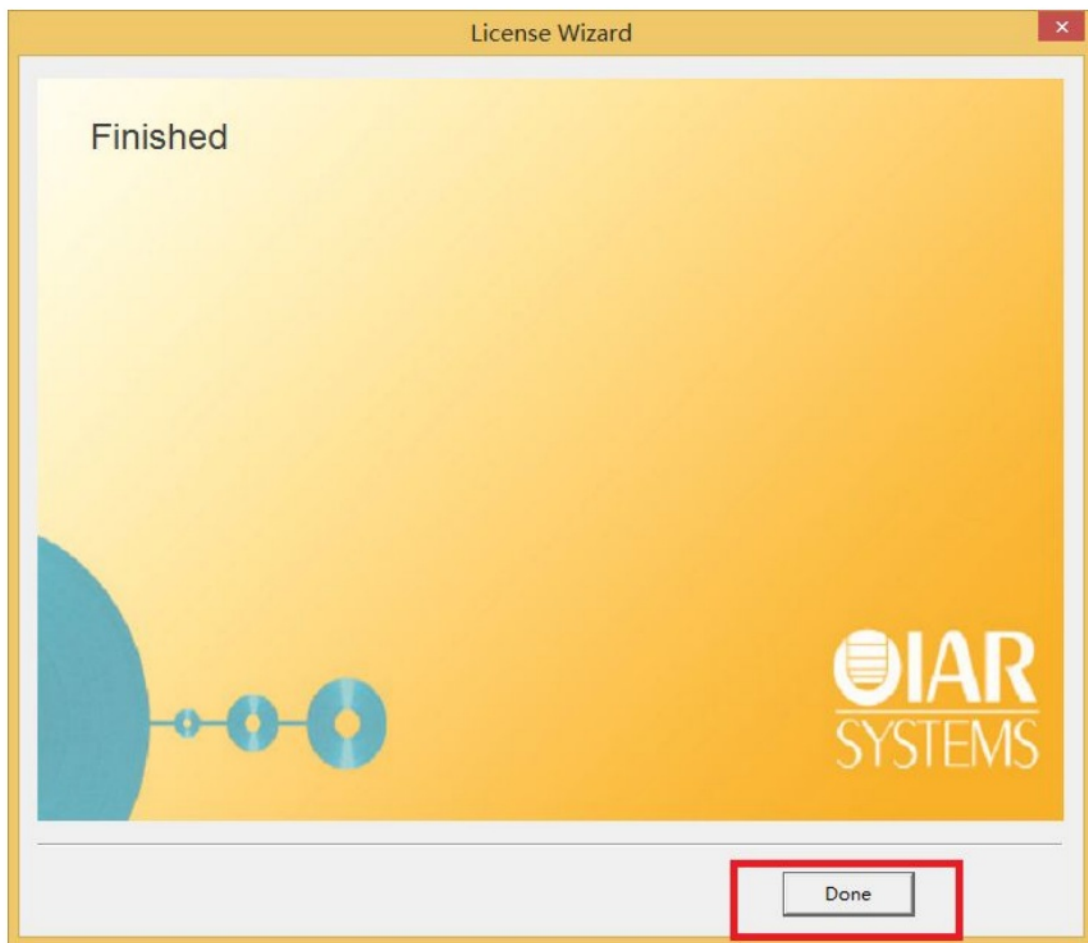

After successfully activating the response file, the following "Done!" message will be displayed.

Return to the license wizard, select the activation response file, and click Next.

Click "Done" to complete the wizard.

After successful activation, the following information will be displayed.
